Note that the thermal conductivity of air at room temperature is  $0.026 \text{ Watt/m}\cdot\text{C}$ , i.e. about 3 times lower than the insulation.

Mechanics (Greek: μηχανική) is the area of physics concerned with the motions of macroscopic objects. Forces applied to objects result in displacements, or

changes of an object's position relative to its environment. This branch of physics has its origins in Ancient Greece with the writings of Aristotle and Archimedes (see History of classical mechanics and Timeline of classical mechanics).
