Harold Jacobs ' s Geometry created a revolution in the approach to teaching this subject, one that gave rise to many ideas now seen in the NCTM Standards. Since its publication nearly one million students have used this legendary text. Suitable for either classroom use or self-paced study, it uses innovative discussions, cartoons, anecdotes, examples, and exercises that unfailingly capture and hold student interest. This edition is the Jacobs for a new generation. It has all the features that have kept the text in class by itself for nearly 3 decades, all in a thoroughly revised, full-color presentation that shows today ' s students how fun geometry can be. The text remains proof-based although the presentation is in the less formal paragraph format. The approach focuses on guided discovery to help students develop geometric intuition.

Ace the SAT—with the expert guidance of CliffsNotes Four full-length practice tests Learning modules in the review sections help readers with different cognitive learning styles Strategies to reduce test-taking anxiety

This book is useful for those who need help in solving day-to-day problems that require arithmetic operations such as fractions, percentages, formulas, and tables. The material is presented in an especially straightforward, simple manner. The book is intend ed for middle and high school students, candidates for standardized tests, adult education students, and anyone who would welcome assistance in dealing with practical problems that occur in every-day living. A large number of practice exercises and tests are included for those who wish to use the book for classroom courses and tests. The book is also highly suitable as a self-teaching guide.
