Principles of Electronic Communication Systems 4th edition provides the most up-to-date survey available for students taking a first course in electronic communications. Requiring only basic algebra and trigonometry, the new edition is notable for its readability, learning features and numerous full-color photos and illustrations. A systems approach is used to cover state-of-the-art communications technologies, to best reflect current industry practice. This edition contains greatly expanded and updated material on the Internet, cell phones, and wireless technologies. Practical skills like testing and troubleshooting are integrated throughout. A brand-new Laboratory & Activities Manual provides both hands-on experiments and a variety of other activities, reflecting the variety of skills now needed by technicians. A new Online Learning Center web site is available, with a wealth of learning resources for students.

The first four chapters of the text describe different types of signals,modulation and demodulation of these signals,various transmission channels and noise encountered by the signals during propagation from sender to receiver end.Apart from this,this part of the book also deals with different forms of line communication systems.A brif introduction of information theory is also given at the end of the text so that the students become familiar with this aspect of communication systems.

New Testament Interpretation through Rhetorical Criticism provides readers of the Bible with an important tool for understanding the Scriptures. Based on the theory and practice of Greek rhetoric in the New Testament, George Kennedy's approach acknowledges that New Testament writers wrote to persuade an audience of the truth of their messages. These writers employed rhetorical conventions that were widely known and imitated in the society of the times. Sometimes confirming but often challenging common interpretations of texts, this is the first systematic study of the rhetorical composition of the New Testament. As a complement to form criticism, historical criticism, and other methods of biblical analysis, rhetorical criticism focuses on the text as we have it and seeks to discover the basis of its powerful appeal and the intent of its authors. Kennedy shows that biblical writers employed both "external" modes of persuasion, such as scriptural authority, the evidence of miracles, and the testimony of witnesses, and "internal" methods, such as ethos (authority and character of the speaker), pathos (emotional appeal to the audience), and logos (deductive and inductive argument in the text). In the opening chapter Kennedy presents a survey of how rhetoric was taught in the New Testament period and outlines a rigorous method of rhetorical criticism that involves a series of steps. He provides in succeeding chapters examples of rhetorical analysis, looking closely at the Sermon on the Mount, the Sermon on the Plain, Jesus' farewell to the disciples in John's Gospel, the distinctive rhetoric of Jesus, the speeches in Acts, and the approach of Saint Paul in Second Corinthians, Thessalonians, Galatians, and Romans.

Comprehensive in scope and contemporary in coverage, this text introduces basic electronic and data communications fundamentals and explores their application in modern digital and data communications systems.

In his book Cotton Fields to Summits, former senior Foreign Service officer, educator, and entrepreneur George Kennedy, describes his 35-year journey to fulfill a lifelong dream to live life beyond his horizons.Each chapter reinforces the view that each of us seeks a measure of success in our lives; that real and gratifying success, the kind that produces those moments of sheer exhilaration, comes from hard work and often difficult choices. George believes strongly that a careful blend of personal qualities and behaviors fortified by a solid skill set and a passion for learning can produce moments of fist-pumping success and a rich and rewarding life. This is the approach that took him from the cotton fields to international summits in Williamsburg, Virginia; London, U.K.; Venice, Italy; and Paris and Strasbourg, France...to name a few. His career did not just evolve. A career that spanned more than three decades with the former U.S. Information Agency, the U.S. Department of State, and the U.S. Department of Commerce, while learning four languages (Italian, German, French, and Korean) was the result of disciplined, focussed, and careful planning for a life of his own design. Life is ultimately about choices is a constant refrain with George therefore, he advises, always bring your best judgment possible to the choices you make. Then take action...and don't look back.
