A capital market is a financial market in which long-term debt or equity-backed securities are bought and sold. Capital markets channel the wealth of savers to those who can put it to long-term productive use, such as companies or governments making long-term investments. Financial regulators like Securities and Exchange Board of India, Bank of England and the U.S. Securities and Exchange Commission oversee capital markets to protect investors against fraud, among other duties. Modern capital ma

~~Capital market - Wikipedia~~

In economics, capital consists of human-created assets that can enhance one's power to perform economically useful work. [citation needed] For example, a stone arrowhead is capital for a hunter-gatherer who can use it as a hunting instrument; similarly, roads are capital for inhabitants of a city. Capital is distinct from land and other non-renewable resources in that it can be increased by ...
