Environmental analysis is a strategic tool. It is a process to identify all the external and internal elements, which can affect the organization ' s performance. The analysis entails assessing the level of threat or opportunity the factors might present. These evaluations are later translated into the decision-making process. The analysis helps align strategies with the firm ' s environment.

What is Environmental Analysis?

An environmental analysis identifies external and internal issues so that you can understand what is going on in the context and industry where your organization operates, enabling you to make decisions about what the performance management system looks like against the backdrop of this broader context.

How to Conduct an Environmental SWOT Analysis - dummies

An environmental analysis reviews current environmental conditions to forecast a future business environment. The static nature of the analysis ensures that unexpected environmental changes are not considered in a company ' s business projections.
