Evaluating Websites and Web Services: Interdisciplinary ...

Instead of looking only at print resources, it is now possible to have fast and easy access to the best and the worst on the Web. This may make you think that the Internet is a better source of information than books and journals. In fact you need to be more careful with information found on the web because anyone can set up a web page.

Evaluating web pages - Research & Learning Online

Ideally, you build a successful website with a strategy in mind — one that involves multiple different focuses. The four key focuses for website evaluation are content and readability, aesthetics, usability, and social media and search engine optimization (SEO). Aesthetics. This is the category that most people think of when determining a website evaluation criteria.

How to Evaluate the Quality of Your Website Design ...

When evaluating a Web site, ask yourself, who has written the Web site content? Are the author's credentials given? Think about the author's expertise and credibility. Knowing who wrote the content can help you determine the Web site's trustworthiness. You may find an author whose credentials are not given on the Web site.

Evaluating Web Sites - UMGC Library

This is all about the practical consideration of what makes a good web site design, such as user-friendliness, speed, security, site maps and other technical details, etc. Many of these details are not visually apparent—you will not see a website's security when typing in the URL. Even so, usability will make or break a website.
