This manual provides technical information covered by warranty. For the major circuit necessary for servicing the Yaesu FT -847 HF & boards, each side of the board is identified by V/UHF-Band Transceiver. It does not include information on the type of the majority of components installed on installation and operation, which on that side.

make manual uplink adjustments. Some satellites, like RS-12, use a transponder in which the uplink and downlink frequencies track in the same direction. Other satellites, like AO-IO, FO-20, and F-0-29 use "inverted" tracking, whereby moving your uplink signal higher in frequency lowers your downlink frequency. The FT-847 is ready for either situation, and you may also make minor Doppler-shift ...
