LIS 650/ Management of Libraries and Information Centers (3)
Basic theories and principles of administration for effective management of public, academic, and special libraries and information centers, with emphasis on planning, organizing, staffing, directing, and control.

LIS 650: Management of Libraries & Information Centers

In the modern information society, libraries and information centres have a new role to play. This is due to increasing use of web-based information sources and electronic services. Libraries are also being managed in a more democratic way due to flexible communication system and efficient work organisation.

LIBRARY AND INFORMATION CENTRES : CONCEPT AND ROLE IN ...

Library management is a sub-discipline of institutional management that focuses on specific issues faced by libraries and library management professionals. Library management encompasses normal managerial tasks, as well as intellectual freedom and fundraising responsibilities. Issues faced in library management frequently overlap with those faced in managing non-profit organizations. The basic functions of library management include, but are not limited to: planning and negotiating the acquisiti

This revised edition presents the classic principles of library management in the context of current technological advances and a shifting social environment. It aims to offer librarians and students of library science a management process that supports library goals and objectives.

This comprehensive handbook covers key management issues and will guide information professionals through the maze of common problems. To reflect the increasing integration of library, information centre, records, IT and telecommunications management, the book takes an integrated approach to managing the modern information centre. Topics covered range from strategic, IT and human resource planning, to leadership, conflict and change management. Further key areas include service delivery, risk management and the information lifecycle.

Now available for the first time in print, the dictionary is the most comprehensive and reliable English-language resource for terminology used in all types of libraries. With more than 4,000 terms and cross-references (last updated January, 2003), the dictionary's content has been carefully selected and includes terms from publishing, printing, literature, and computer science where, in the author's judgment, they are relevant to both library professionals and laypersons.

Discusses various aspects of collection development, including publishers, censorship, serials, legal issues, intellectual freedom, resource sharing, audiovisual materials, and electronic materials.

Addresses the art of controlling and updating your library's collection. Discussions of the importance and logistics of electronic resources are integrated throughout the book.

Knowledge Management in Libraries: Concepts, Tools and

Download File PDF Library And Information Center Management Library And

Approaches brings to the forefront the increasing recognition of the value of knowledge and information to individuals, organizations, and communities, providing an analysis of the concepts of Knowledge Management (KM) that prevails among the Library and Information Science (LIS) community. Thus, the book explores knowledge management from the perspective of LIS professionals. Furthermore, unlike most books on the topic, which address it almost exclusively in the context of a firm or an organization to help gain a competitive advantage, this book looks at knowledge management in the context of not for profit organizations such as libraries. Describes the theory and approaches of knowledge management in the context of librarianship Seeks to identify and explain the principles that underlie the different processes of knowledge management Combines the theoretical and practical perspectives of the topic Provides a comprehensive and methodological approach to support librarians and information science professionals in the implementation of knowledge management in libraries and information centers Proposes a model for libraries and information centers which may be used as a guide for implementation Incorporates illustrations where necessary to provide a clear understanding of the concepts
