Secondary Number Talks (I'll convince you with ducks ...

Number talks are often short, five to ten minute, whole-class moments wherein students mentally calculate solutions to computational exercises to develop flexibility in thinking and reasoning. Students then discuss their ideas, attending to the “ why ” instead of just “ how .”. The teacher records the student’s thinking in a non-evaluative manner, probing for clarification if specific steps or decisions are unclear.

The key elements to number talks are a de-emphasis on speed and right answers and an added emphasis on process and communication. Here’s how they work: The teacher writes a problem on the board. It can be as simple (like $9 + 17$) or complex ($500 \div 24$) as long as it is appropriate as a mental math problem for the class.

Number Talks in Grade 8

Number Talks in High School Math Though there are times I fly by the seat of my pants, I usually have plenty of printed materials ready to go for my students. To do Number Talks right, printed material had to go right out the window along with calculators, pencils and even blank paper.

Scaffolded Math and Science: Number Talks in High School Math

Number Talks. Number talks were developed for classroom teachers to engage students in “mental math” through grappling with interesting mathematics problems. Educators can use number talks regularly as introductions to the day’s mathematical practice, as “warm ups” for other lessons, or as stand-alone extended engagements with mathematical concepts.
