This beginner's French textbook offers a traditional approach, with a focus on a functional view of language, stress on culture, and the use of authentic material. It uses a large number of texts on contemporary topics as a base for listening and reading practice, and seeks to develop students' writing and speaking skills by means of carefully sequenced activities leading to self-expression. It presents grammar gradually, and in the context of authentic texts and actual spoken usage.

Intersections expands upon the features that have made it so popular in two- and four-year colleges and universities around the world. Réseau conceives of the teaching of French as a holistic endeavor, not only in terms of language skills--speaking, listening, reading, and writing--but also in terms of cultural knowledge in the broadest sense. Based on the belief that knowledge of a second language and culture necessarily brings about a greater understanding not only of the world in an increasingly global context, but also of the individual self, the content and activities in Réseau offer students the opportunity to reflect on the differences between their own and French and Francophone cultures and experiment with the new identities that so many researchers suggest language learning can encourage.
