Offers expert comparative analysis of the child's best interests within the context of Article 3 of the UNCRC.

The popular image of the frontier lawman fearlessly facing down outlaws in dusty, windswept streets is a lot of myth and a little reality. Ball shows that few southwestern sheriffs were genuine gunmen but that wielding firearms with nerve and determination in the line of duty was expected of them by their constituents. Elected for two-year terms, frontier sheriffs were the principal peace-keepers in counties that were often larger than New England states. Officers of the court, they defended settlers and protected their property from

the violence ever-present on the frontier. Their duties ranged from tracking down stagecoach robbers and serving court warrants to locking up drunks and quelling domestic disputes. Sheriffs were also jail keepers, tax collectors, quarantine inspectors, court-appointed executioners, and dogcatchers. The breadth and detail of Ball's study, which includes informative lists of sheriffs, legal hangings, and lynchings, make this volume the definitive work on frontier law enforcement.

This is the first work devoted to setting the legal system of the early 15th century in its social and political context. Rejecting the traditional view of late medieval England as chronically lawless and violent, Powell emphasizes instead the structural constraints on royal power to enforce the law, and the king's dependence on the cooperation of local society for keeping the peace.

A case study of law and legal culture in the West during the nineteenth century

Trends in the Judiciary: Interviews with Judges from Across the Globe, Volume Four, provides insights into the lives, working environments, and social milieus of a select group of judges. These legal luminaries, often viewed as pedantic in their ontology, serve the crucial role of preserving the human rights of individuals. This text offers detailed data emanating from the narratives of judges who were interviewed by a wide range of academicians, from emerging and mid-career scholars to professionals and established professors. The narratives of the judges are interspersed with research data and country details in an effort to enhance the knowledge base of the readership. Judges from Asia, Africa, the Caribbean, Europe, the Pacific Islands, New Zealand, North America, and South America all contributed to this text by sharing information on their careers as well as insights as they traversed their profession. The readership of this manuscript will experience the thought processes of judges in relation to the social, cultural, economic, and political context of their respective nations and the gender issues, subtle attempts at juridical control, dealing with powerful criminals, and the lives of judges who have other interests besides "interpreting and applying the law." The international, cross-cultural perspectives presented in this book should be of significant interest to academics, practitioners, students, criminologists, and the criminal justice community, and those interested in comparative legal studies across the globe.

New Mexico's Elfego Baca earned a place in Southwestern legend in 1884 as a young deputy sheriff of Socorro County. In the town of Frisco he held off a gang of rioting cowboys for 36 hours, killed four of the gang, wounded eight others, and walked away without a scratch. But there was more to Baca than this incident. He rose in his accidental profession of the law to a political career that last a half-century. He served as sheriff of Socorro County, practised law, operated a detective agency, published a Spanish language newspaper, became associated with the Victoriano Huerta movement in the Mexican Revolution, and engaged in real estate and mining speculation. While a lawyer by profession, politics were Baca's ruling passion. He held numerous local elective offices but his hopes for a career in federal service were dashed with the disgrace of Secretary of the Interior Albert Bacon Fall.
